

## Topics Innominate can comment on

### Cost of Downtime

- Energy supplies
- Production lines
- Total cost of ownership

### Viruses in the Industrial Network

- Exposed to same threats as office networks
- Old software, new threats

### Industrial Security as a Growing Market

- New security area
- Just in time manufacturing
- New playground for hackers
- Secure remote maintenance
- Specific needs of industrial networks and production cells

### The Human Element in Industrial Security

- How viruses infect networks
- The weaknesses of traditional central firewalls
- The threat of convergence

### Nature of Threat to Industrial Production Cells

- Internal threats
- Threat from portable devices
- Danger from laptops
- Accidental
- Disasters

### Regulatory Compliance

- For different verticals
- In different countries
- Securing validated systems

### Solutions

- Compact hardware firewall with VPN and Anti-Virus function
- Decentral firewall concept versus centralized traditional security approach
- Firewall appliance moves closer to the machine
